

SOIL HEALTH CARD

Government of India • Department of Agriculture & Farmers Welfare

Farmer Name	Ramesh Patil	Sample No.	SHC-2026-04821
Village	Wagholi	Sampling Date	12-Aug-2026
Taluka / District	Haveli, Pune	State	Maharashtra
Survey / Khasra No.	142/3	Area Tested	1.2 Hectares

SOIL TEST RESULTS

Parameter	Value	Unit	Rating
Available Nitrogen (N)	245	kg/ha	Medium
Available Phosphorus (P)	18.4	kg/ha	Low
Available Potassium (K)	312	kg/ha	High
Soil pH	6.8	-	Normal
Electrical Conductivity (EC)	0.42	dS/m	Normal
Organic Carbon (OC)	0.58	%	Medium
Available Sulphur (S)	14.2	ppm	Medium
Available Zinc (Zn)	0.62	ppm	Low
Available Iron (Fe)	4.8	ppm	Sufficient
Available Manganese (Mn)	3.1	ppm	Sufficient
Available Copper (Cu)	0.9	ppm	Sufficient
Available Boron (B)	0.38	ppm	Low

GENERAL FERTILIZER RECOMMENDATION

Based on the nutrient status above, apply nitrogen and phosphorus at recommended dose for the intended crop; potassium application may be reduced given the current High rating. Apply zinc sulphate and borax as basal dose to correct the Low Zn and B status. Retest soil after 2–3 cropping seasons.
